EDUCATION

☑️ Ongoing learning through documentation, online courses, and hands-on project building.

SKILLS

- JavaScript (ES6+)
- TypeScrit
- React.js
- Next.js
- Node.js / Express.js
- Git & GitHub
- Mongo DB
- PostgreSQL
- MySQL
- Prisma
- Drizzle
- Mongoose

LANGUAGES

- English (fluent)
- Kiswahili (fluent)

PROFILE

Self-taught and highly motivated Web Developer with 2 years of hands-on experience in building full-stack applications. Passionate about solving real-world problems with clean, efficient code and modern technologies. Proven ability to work independently and in team environments, with strong communication and problem-solving skills.

PROJECTS

1. NETFLIX CLONE:

A full-stack Netflix clone built using the MERN stack (MongoDB, Express, React, Node.js), offering a seamless streaming experience. This project features user authentication, movie browsing, dynamic search, and a responsive UI. Integrated JWT authentication ensures secure access.

Technologies used:
- React.js
- Node.js
- Express.js
- Mongo DB
- Tailwind CSS
- TMDB API

2. RECIPE APP

A user-friendly web application that allows users to explore, search, and save a variety of recipes. Features include category-based browsing, detailed cooking instructions, ingredient lists, and the ability to add and manage personal recipes. Built with a focus on responsive design and intuitive user experience.

Technologies used:
- React.js
- The Meal DB API
- Tailwind CSS

3. VIDCHA

Vidcha is a video calling and chat platform that lets you connect with friends through high-quality calls and instant messaging. You can easily send and receive friend requests, making it simple to grow your network. Powered by Streamify for a smooth and reliable experience

Technologies used:
- React.js
- The Meal DB API
- Tailwind CSS
